About Us

Sans Souci Towing (SST), established in 1960, is one of South Africa's most experienced and trusted towing, recovery, and transport companies. Our operations are built on the pillars of safety, technology, professionalism, and continuous improvement.

With operational branches in Gauteng, Limpopo, and Mpumalanga, and a nationwide service footprint extending into neighbouring borders, SST provides 24/7/365 assistance anywhere in South and Southern Africa.

Our dedicated control room operates around the clock, supported by custom-developed digital platforms – the SST App and Track My Tow client portal – enabling live dispatching, operator communication, and real-time job tracking.

SST's diverse and modern fleet includes rollbacks, heavy-duty wreckers, 4x4 recovery units, lowbeds and multiple rotating wreckers, including a 65-ton recovery unit, among the most capable in South Africa.

Company Overview

Established on the foundations of safety, reliability, and professionalism, Sans Souci Towing has evolved from a small regional towing business into a multi-branch, technology-driven leader in the towing and recovery industry.

We serve a wide range of clients, including:

- Major insurers and brokers
- Logistics companies and fleet managers
- Corporate clients
- Panelbeaters & Mechanics
- Industrial and mining operations
- Law enforcement and emergency response agencies
- Private customers and road users

SST's digital ecosystem – the **SST App** (operator and control room interface) and the **Track My Tow** client portal – ensures:

- Verified real-time communication
- Accurate dispatch-to-completion tracking
- Time-stamped photographs and event logs
- Total transparency and accountability

Core Services

Towing & Recovery Operations

- Light-, medium-, and heavy-duty tow truck operations
- Accident recovery & vehicle retrieval operations
- HDUL and Rotator recoveries (up to 65 tons)
- Mechanical tows
- Off-road, 4x4 and mud recoveries
- Client site and Industrial Recoveries

Transport & Logistics

- Rollback transport
